Summary

Passionate Junior Full Stack Developer with a background in international project supervision. After years of managing complex construction projects in Dubai — coordinating teams, meeting deadlines, and maintaining direct client communication — I transitioned into web development, bringing the same problem-solving mindset and attention to detail to every project I build.

Currently completing a Master in Full Stack Development at start2impact (Jan–Jul 2026), with hands-on experience in HTML5, CSS3, JavaScript, Bootstrap, SCSS/Sass, Git and GitHub. I build clean, responsive, and accessible interfaces and I'm actively looking for a junior role where I can grow fast and contribute from day one.

Skills

Category	Technologies
Languages	HTML5 · CSS3 · JavaScript
Frameworks	Bootstrap 5
Preprocessors	SCSS / Sass
Tools	Git · GitHub · GitHub Pages · VS Code
Concepts	Responsive Design · Flexbox · Grid · BEM · Accessibility (ARIA) · SEO / Open Graph
Currently Learning	JavaScript (advanced) · React.js · Angular.js

Projects

Portfolio Website

<https://gcangemi1997-coder.github.io/> | <https://gcangemi1997-coder.github.io>

Personal developer portfolio showcasing my projects and skills. Built entirely from scratch with HTML5, CSS3, SCSS and Bootstrap 5. Features a fixed sidebar navigation on desktop, a CSS-only hamburger menu on mobile, smooth hover animations and Open Graph meta tags for social media sharing. Hosted on GitHub Pages.

Stack: HTML5 · CSS3 · SCSS/Sass · Bootstrap 5 · Git · GitHub Pages

DnA Project

gcangemi1997-coder.github.io/DnA_Project | github.com/gcangemi1997-coder/DnA_Project

Multi-page responsive website built with HTML5 and CSS3. Focused on clean visual design, structured layout and cross-browser compatibility. Demonstrates solid command of CSS fundamentals including Flexbox, custom animations and consistent typography.

Stack: HTML5 · CSS3 · Git · GitHub Pages

GreenEarth Project

gcangemi1997-coder.github.io/GreenEarth_Project | github.com/gcangemi1997-coder/GreenEarth_Project

Single-page eco-themed landing page built with HTML5 and CSS3. Demonstrates responsive Flexbox layout, CSS keyframe animations and a cohesive visual theme built around environmental messaging. Fully responsive across all screen sizes.

Stack: HTML5 · CSS3 · Flexbox · Git · GitHub Pages

Experience

Construction Supervisor

GeSePro / H.I.Q. High Italian Quality — Dubai, UAE *February 2019 – February 2023 (4 years)*

Managed end-to-end delivery of construction projects (shops, villas, apartments) in an international environment.

- Coordinated multidisciplinary teams across tight deadlines
 - Served as primary point of contact for clients, providing regular progress updates
 - Ensured quality standards and on-time delivery across all project phases
 - Developed strong problem-solving and communication skills now applied to software development projects
-

Construction Worker

PROCOITEC Srls — Palermo, Italia *September 2020 – February 2021 (6 months)*

- Gained hands-on experience working from the ground up, taking on increasing responsibilities
 - Key tasks: Bricklaying, Flooring, Electrical work
-

Education

Master in Full Stack Developer

start2impact — Remote *January 2026 – July 2026 (in progress)*

Comprehensive full stack development program covering HTML5, CSS3, JavaScript, React, Node.js, databases and modern development workflows.

Diploma di Maturità — Elettrotecnica

Istituto Tecnico Statale Vittorio Emanuele III — Palermo, Italia *2011 – 2016*
